**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/29/03 has been entered. Claims 1, 3-6, and 9 are pending in this application. Claims 2, 7-8 are cancelled.

***Specification***

The amendment filed 11/5/03 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: Applicant has indicated support for the phrase "wide surface flexible" in Fig. 2, ref. 12 and in the specification P. 7, lines 8-15. Although the specification supports the term "flexible solar cell", there appears to be no support for the term "*wide surface*". Applicant is required to cancel the new matter in the reply to this Office Action or indicate further support for the term "*wide surface*".

***Claim Rejections - 35 USC § 112***

Claims 1, 3-6 and 9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contain the term "wide surface" which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicant has indicated support for the phrase "wide surface flexible" in Fig.

2, ref. 12 and in the specification P. 7, lines 8-15. Although the specification supports the term “flexible solar cell”, there appears to be no support for the term “*wide surface*”.

### ***Response to Arguments***

Applicant’s arguments, see amendment, filed 11/5/03, with respect to claims 1, 3-6, and 9 have been fully considered and are persuasive.

Applicant has amended the specification and claim language and replaced the term “photovoltaic” with the term “solar”. It is the examiner’s position that these terms are synonymous terms, and Applicant has amended the application utilizing the term “solar” in order to maintain consistency throughout the application.

Applicant’s assertion, that the prior art of record does not teach the use of flexible solar cells, the filtration mechanism, and the combination of elements specifically claimed in amended claim 1, is persuasive.

### ***Allowable Subject Matter***

Claims 1, 3-6 and 9 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, first paragraph, set forth in this Office action.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Schiel et al. (3,950,862) – disclose a solar cell arrangement for detecting laser radiation to simulate rifle fire.
- Benckert et al. (USPN 4,299,393) – disclose a flexible fiber optic target for detecting laser radiation.
